WORK BEGINS TO INSTALL RUMBLE STRIPS ON STATE ROUTE 58

SAN BERNARDINO COUNTY – The California Department of Transportation (Caltrans) will begin a project to install rumble strips in the center median on State Route 58 (SR 58) from the Los Angeles County Line to approximately six miles east of Kramer Junction. The work will begin on Monday, August 23 and continue until the beginning of September 2004. Lane closures will take place from 7:00 a.m. to 4:00 p.m., however one lane will remain open during construction hours.

Rumble strips are described as grooves in the asphalt which alert motorists that their vehicle is leaving the lane. These strips will reduce passing related accidents along this stretch of SR 58. Passing zones, indicated with double-yellow lines, will still be available where safe. The purpose of this project is to improve the safety and operation of the highway.

The California Highway Patrol (CHP), pilot cars, and flagging will be used to direct and monitor traffic during construction and to assist with the passing operation. Your patience is appreciated during this safety project. Keep alert, pay attention, be prepared for reduced lanes and **Slow for the Cone Zone**.
